EDUCATION

B.Tech in Computer Science & Engineering - 2026 , Lovely Professional University, Phagwara
Coursework: Data Structures & Algorithm, AI & ML, Operating System, Computer Networks, Database Management System

TECHNICAL SKILLS

Programming:	Typescript, Python, Data Structure & Algorithms
Development:	ReactJs, React Native, NodeJs, ExpressJs, PostgreSQL, MongoDB, Custom RAG Pipeline, Fine-tuning of LLMs, Milvus (Vector DB), Neo4j (Graph DB)
Other:	Git & Github, Redis, CICD, AWS Cloud & GCP, Docker, Kubernetes, Websockets

EXPERIENCE

Software Development Engineer July 2025 - Present
Outscale.ai *India*

- Developed Real Time sales coaching product & end to end RAG Pipeline for enterprise search product by using **Milvus (Vector DB), text-embedding-small-3 (Embedding Model), fine-tuned version (on sales dataset) of gpt-4o-mini, PostgreSQL (Relational DB), Cohere (Re-ranker)**

- Developed an AI Agent for sales call analysis & enterprise content search using Node.js, Express.js, RAG and Fine-tuning Generative AI.

- Developed pipeline of realtime sales co-pilot (on call ai assistance for sales) by using **Typescript** , **PostgreSQL (Relational DB) , Websockets**
- Deployed the microservices on **AWS** & **GCP** with **CICD** best practices.

PROJECTS

Open Router Clone

- Built a multi-provider LLM gateway (OpenAI & Gemini) with a unified REST API, strategy-pattern adapter layer in Bun for pluggable providers, and per-model token pricing deployed on Express, Prisma, and PostgreSQL.

- Implemented JWT auth, API key management, and atomic credit-based billing, paired with a React 19 dashboard featuring live chat, API key controls, and a custom SVG analytics chart.
